OpsSure

Optimised for uptime.
## Engineered for throughput.

Trusted by industries that can't afford downtime.

With over 20 years of experience delivering enterprise-grade connectivity to regional and remote operations, satellite experts Orion Satellite Systems created OpsSure for teams who need dependable connectivity and clear, real-time control—whatever their infrastructure.

Why OpsSure?

- **99.995% uptime to keep you online**
- **Real-time failover to prevent costly outages**
- **Monitor and manage every site in real time**
- **Australia's leading enterprise-grade support**
- **AI-led data forecasting through Horizon AI**

Keeping Operations Online and Productive

Downtime costs money. OpsSure delivers instant ROI with dual links, continuous monitoring, and automatic failover—eliminating manual fixes and lost productivity.

Horizon AI – Control at Your Fingertips

HORIZON AI

At the heart of OpsSure is the award-winning Horizon AI portal, giving you total visibility and control of your satellite services. Real-time monitoring, predictive analytics, and AI-driven insights help you forecast demand, allocate bandwidth, and scale up or down instantly, optimising costs and avoiding overages.

Built for the Demands of Remote Business

Orion Satellite Systems is **ISO 27001:2022 certified** for world-class information security and backed by Australia's leading enterprise support. It's engineered to keep your operations moving—safely, reliably, and efficiently.

The OpsSure Difference

Instant ROI – Stay connected during outages and protect productivity

Peace of Mind – Multi-path redundancy for any technology

Uninterrupted Operations – Maximise output across all sites

Smarter Data Control – Prioritise critical apps and forecast usage

Rapid Deployment & Local Support – Quick setup backed by Australian-based experts
